👤 PERSONAL STATEMENT:

A highly motivated student at the University of Rwanda, pursuing a Bachelor's in Business Information Technology (BIT Level 3). I'm passionate about using technology and innovation to solve real-world problems and create digital solutions that make life easier. Skilled in web development, Microsoft Offices, Google Tools, Graphic design and teamwork, I bring creativity, discipline, and a results-driven mindset to every project I take on. My goal is to grow into a leading professional who bridges technology with impact.

🧩 EXPERIENCE

12/2025 – 06/2026
Kigali, Rwanda

Backend Developer

I was Backend Development Intern for the Rwanda ICT Chamber, with the following responsibilities:

1. System Architecture & Database Management

- Develop and maintain the core logic, processes, and data structures of the application's server-side.
- Assist in designing, implementing, and optimizing database schemas (e.g., SQL, NoSQL) to ensure data integrity, security, and performance.
- Contribute to the design of scalable and maintainable backend architecture, including microservices or monolith structures.

2. API Development & Integration

- Implement RESTful APIs or GraphQL endpoints to facilitate seamless communication between the front-end interface and the database.
- Ensure APIs are well-documented, secure, and adhere to performance standards.
- Integrate third-party services, payment gateways, and external APIs as required for product functionality.
- Assist in implementing security protocols, authentication (e.g., OAuth, JWT), and authorization mechanisms to protect sensitive data and user accounts.
- Implement unit tests and integration tests to ensure code quality and system reliability.

3. Collaboration with Development Teams

- Work closely with the front-end development team to define API contracts and data models required for interface functionality.
- Collaborate with the management team and offer assistance in creating workflows and

executing different relative tasks.

- Participate in code reviews, contributing constructive feedback to peers and adhering to organizational coding standards.

4. Deployment, Monitoring, & Documentation

- Assist in setting up deployment pipelines (CI/CD) and maintaining the application in production environments.

- Learn and utilize monitoring and logging tools to track application performance, identify bottlenecks, and troubleshoot issues.

- Document all technical design decisions, API specifications, and database structures made

during the development process.

Additional Responsibilities:

5. Training and Knowledge Sharing: Support knowledge sharing and provide training about the

different platforms to the beneficiaries.

6. Customer Support and Feedback Management: Provide timely and professional assistance to

users, collect feedback on products or services, keep records and relay insights to the development

and design teams for continuous improvement.

10/2025 – 01/2026
Huye, Rwanda
